- 5** Use the keyhole slots to install the fixture(s).
- 6** If using a plug-in wall feed, replace the diffuser (reversal of section 1A) and skip to section 3.

**Hard Wire the Fixture**

- 1** Remove the fixture cover by squeezing the inside of the cover to release it.

- 2** Determine the desired location of the conduit connection and remove one of the knockout from the back of the fixture.
- 3** Install the conduit adapter to the determined knockout location and feed the flexible conduit and the power lines into the fixture. Secure it by tightening down the screw on the conduit adapter.
- 4** Push the neutral power line to the wire connector with the pre-installed white wire.
- 5** Push the hot power line to the wire connector with the pre-installed black wire.
- 6** Connect the fixture to a suitable ground in accordance with local electrical code.
- 7** Properly place the wires and wire connectors into the top half of the fixture, replace the fixture cover (reversal of section 2A).
- 8** Replace the diffuser (reversal of section 1A).

### Plug-In Wall Feed

- 1** Using the Plug-In Wall Feed, plug the Undercabinet unit directly into a wall outlet.

### Jumper Connector

- 1** Remove the connector cover and use the Jumper Connectors to link multiple Undercabinet units to one another.
