Required Electrical Service

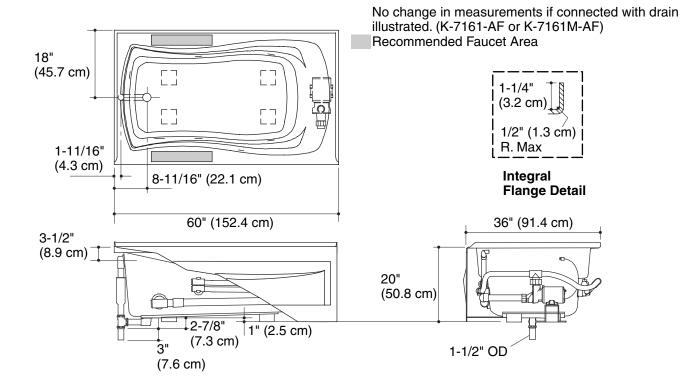

Dedicated circuit required, protected with Class A Ground-Fault Circuit-Interrupter (GFCI):				
Pump/control	120 V, 15 A, 60 Hz			
Locate the outlet behind the whirlpool and within 24" (61 cm) of the pump.				

Installation Notes

Install this product according to the installation guide.

Floor support under whirlpool must provide for a minimum of 44 lbs/square foot (214 kg/square meter) loading.

If installing a rim-mount faucet, make sure there is no interference with the drain overflow before drilling any holes. Consult local and national codes for minimum air gap requirements if installing a spout on the faucet deck.
