

Chromecast & Chromecast Ultra

CAST YOUR FAVORITE ENTERTAINMENT FROM YOUR PHONE, TABLET, OR LAPTOP TO THE BEST SCREEN IN YOUR HOUSE.

Chromecast

Chromecast Ultra

CHROMECAST

Chromecast is a media streaming device that plugs into your TV's HDMI port. Cast movies, TV shows, and music from your iPhone®, iPad®, Android phone or tablet, Mac® or Windows® laptop, or Chromebook to your TV with a single tap.

Your phone is your remote

Open a Cast-enabled app, and tap the Cast button to send content to your TV. Then search, play, and pause, right from your phone. Chromecast works with your favorite devices, so there's no remote to lose and no new interface to learn.

Mirror your device

See anything on your Android screen or your laptop's Chrome browser on your TV. Search the web, watch funny home movies, or show off your latest vacation pics on the big screen.

Enjoy 1000+ Cast-enabled apps

Enjoy TV shows, movies, music, sports, and games from your favorite Cast-enabled apps, like YouTube, Netflix, and Spotify. Want more? Open the Google Home app to browse content and get recommendations.

Multitask while you cast

You can do other stuff while you're casting too, like answer your phone, send text messages, and play your favorite gaming apps.

CHROMECAST ULTRA

Chromecast Ultra delivers everything you love about Chromecast, **plus** up to 4K Ultra HD and HDR picture quality*, faster processing, and a built-in ethernet adapter. It's compatible with all your favorite devices, too.

Start casting in 4K Ultra HD today

When combined with a 4K TV*, Chromecast Ultra delivers up to 4K Ultra HD and HDR content**. Enjoy crisper pictures, deeper colors, and smoother videos — not to mention faster load times, and advanced color-space content.

The fastest Chromecast yet

With its enhanced processing power, you'll be able to get your shows playing faster, more reliably, and with smoother video. Use the optional built-in ethernet adapter for rock-solid streaming in tricky Wi-Fi environments.

The best picture your TV can get

No 4K TV? No problem. Chromecast Ultra automatically optimizes content, so you'll be able to watch your favorite shows and movies at your TV's maximum resolution.

* While Chromecast Ultra will work on a standard HDTV, it requires a 4K-compatible HDTV with an HDMI port and a broadband Internet connection to stream content in 4K. More information is available at g.co/cast/req.
** 4K programming subject to availability from content providers, and will only play on 4K TVs.

Why choose Chromecast?
