**1 Turn Off Water Supply • Cierre el suministro de agua • Couper l'alimentation en eau**

Locate the water supply inlets & shut off the water supply valves. These are usually found near the water meter.

If you are replacing an existing unit, remove the old unit & clean mounting surface thoroughly.

Ubique las entradas del suministro de agua y cierre las válvulas de suministro. Estas se encuentran generalmente cerca del medidor de agua. Si reemplaza una unidad existente, retírela y limpie completamente la superficie de montaje.

Repérez les entrées d'alimentation d'eau et fermez les robinets d'arrêt. Ils sont normalement trouvés près du compteur d'eau. Si vous remplacez un appareil existant, enlevez le vieil appareil et nettoyez soigneusement la surface de montage.

**Check for leaks above and below the sink.**

Revise si hay fugas encima y debajo del fregadero

Assurez-vous qu'il n'y a pas de fuite au dessus ou au dessous du lavabo

## 10 Flush Hose

### Limpiar la manguera

### Rincer le tuyau

Open Valves to full on position and press down on Diverter Valve allowing water to flow to the Spray Hose. Run water for one minute. Repeat in hot and cold positions.

Abra las válvulas hasta la posición de encendido completo y presione hacia abajo la válvula desviadora para permitir que el agua fluya hacia la manguera de rociado. Deje correr el agua por un minuto. Repetir en posiciones frías y calientes.

Ouvrez les vannes à fond et appuyez sur la vanne de répartition pour permettre à l'eau de s'écouler dans le tuyau de pulvérisation. Faites couler l'eau pendant une minute. Répétez dans les positions chaudes et froides.

## 11 Install Handheld and Functions

### Instalar la ducha de mano y funciones

### Installer la douche et les fonctions
